EVENT INFO

Energy plays a critical role in maintaining a clean environment and a healthy economy. As population growth and developing economies continue to drive global energy needs, it is even more pertinent for stakeholders to focus on creating solutions to support more efficient energy generation and use and increase energy security.

The current global emphasis on climate change and sustainable living has prompted significant moves, both by governments and the private sector to focus on the benefits of green technology.

Brunei Darussalam, Indonesia, Malaysia and the Philippines created the East ASEAN Growth Area to shift economic activities from resource extraction to higher levels of processing and value-added production, focusing on industries that adopt clean and green technologies. Launched In 1994, the BIMP-EAGA initiative boosts growth in trade, investments, and tourism through new intra-region shipping routes and air links as well as power interconnection projects.

Bridging the Gap

BIMP-EAGA Energy Online Conference and Exhibition (BECE) 2021, is a 2 - Day event comprise of Conference, Networking and Exhibition with the main objectives as follows:

- To promote and create awareness of the BIMP EAGA cooperation initiative.
- To update and encourage investment in the BIMP EAGA region, in the Energy sector.
- To connect all the Energy stakeholders in BIMP EAGA region

This will ultimately bridge the gap between the Oil & Gas and Power and Energy Infrastructure sector's policies of respective regions and its opportunities by delivering a platform that encapsulates all aspects of the said industries.

Together, they combine strategic and technical presentations which drives BECE 2021, focusing on creating an environment that allows government agencies of both local and national levels and private sectors to take an active role in the oil & gas and power and energy infrastructure industry to foster the exchange of ideas, knowledge and expertise, for furthering this energy sector in the BIMP-EAGA region.

In addition, BECE 2021 can provide a more organized and centralized network of opportunities that attracts investors in this sector thus making BIMP-EAGA a noble destination for related energy and green investments.

Offering superior networking, visibility and value, BECE 2021 is important and needed to exploit the large untapped opportunities of this industry in the BIMP-EAGA region, which not only solves current issues on energy and environment, but also serves as a gateway to boost trade, tourism, and investments by easing the movement of people, goods, and services across borders; making the best use of common infrastructure and natural resources; and taking the fullest advantage of economic complementation, thus, generate balanced and inclusive growth as well as contribute to regional economic integration in the ASEAN Economic Community.
